

Quick notes

❖ Check Piazza

❖ Reminders:

- Assign7 due 29th Nov
- Assign8 due 4th Dec
- Weekly quiz

❖ Assignment 10 starts TODAY!

- **Email me your topic**
- Create presentation (<10 min, semi-strict) + brief summary (<200 words)
 - Must present to class (email me if you're in a different timezone)
 - You can pre-record (e.g. youtube)
- Order is here (tentative), let me know ASAP if you are unable to present.
 - May have to shift up/down depending on time
- https://docs.google.com/spreadsheets/d/1rcPnnaa2zH8_3fi3qSLgCKRDdwKggML32HocBnEv6q0/

Feedback / Office Hours / Other

❖ Tameez Latib

- tameezlatib@gmail.com, please add “CS35L” to the subject line
- Office Hours: Monday **5pm-7pm Nov 30** (or by appointment)
- Feedback: <https://forms.gle/6kcJ2aJtzAzFMhHQ7> (anonymous google form)

❖ If you guys are stressed out:

- CAPS (<https://www.counseling.ucla.edu/>)
 - Free with UC ship

❖ Week 8!

- We're almost there...
- Also have a happy thanksgiving!!

Git - merge demo

- ❖ For example in VS code:
- ❖ In test_branch:
 - “This is test branch changes”
- ❖ In main:
 - “This is main change
I add more content”
- ❖ Since we branched out, there is two possibilities.
- ❖ When merging, we get to choose which we keep, or if we want to completely re-edit
- ❖ If you make a mistake and want to go back: git merge --abort

Accept Current Change | Accept Incoming Change | Accept Both Changes | Compare Changes

```
1 <<<<<< HEAD (Current Change)
2 this is test branch changes
3 =====
4 this is main change
5 I add more content
6 >>>>>> main (Incoming Change)
7 |
```

Git - ranges, ..

- ❖ Double dot (get all commits reachable from one, but not the other)
 - `Git log master..experiment` -> return D, C
 - D, C are reachable from experiment, but not reachable from master
- ❖ `git log origin/master..HEAD`
 - Reachable from HEAD but not from origin/master
 - Shows you what you have committed, but not pushed!
- ❖ `git log experiment --not master`
 - Equivalent to double dot, and can use even more branch names if applicable
- ❖ <https://git-scm.com/book/en/v2/Git-Tools-Revision-Selection>

Git - ranges, ...

- ❖ Triple dot (get all commits reachable from either, but not both)
 - `Git log master...experiment -> return F, E, D, C`
 - Use `--left-right` so that output shows which branch each commit belongs to

```
$ git log --left-right master...experiment  
< F  
< E  
> D  
> C
```

Git - commit syntax

- ❖ ~ refers to parent
- ❖ ^ refers to first parent
 - E.g. merge, have two parents
- ❖ Git log branch...branch~~
 - Gets the two previous commits (from branch)
 - Git log master...master~3 -> returns F, E, B

Git - commit syntax

- ❖ Git log looks ugly :(
- ❖ `Git log --pretty=format:'%h %s' --graph`
 - %h = hash val (short), %s = message
 - `--pretty=oneline` works too
 - Better(?)

```
$ git log --pretty=format:"%h %s" --graph
* 16f3c44 test c
*   c495b4e Merge branch 'master' into test_branch here is a commit message...
|
| * 3414a25 branch master
| * | fb85dd0 this is a branch
|/
* 35f1f59 changed file1
* 303f358 This is my first commit
```

```
$ git log
commit 16f3c44b6bb1db00673738e15055dcb5d1a96d00 (HEAD -> test_branch)
Author: tluccs <tameezlatib@gmail.com>
Date:   Mon Nov 23 12:23:22 2020 -0800

    test c

commit c495b4e3ef79f1e17bf5f3f51319284a0f05188e
Merge: fb85dd0 3414a25
Author: tluccs <tameezlatib@gmail.com>
Date:   Mon Nov 23 10:31:07 2020 -0800

    Merge branch 'master' into test_branch
    here is a commit message...
```

Git - refresher

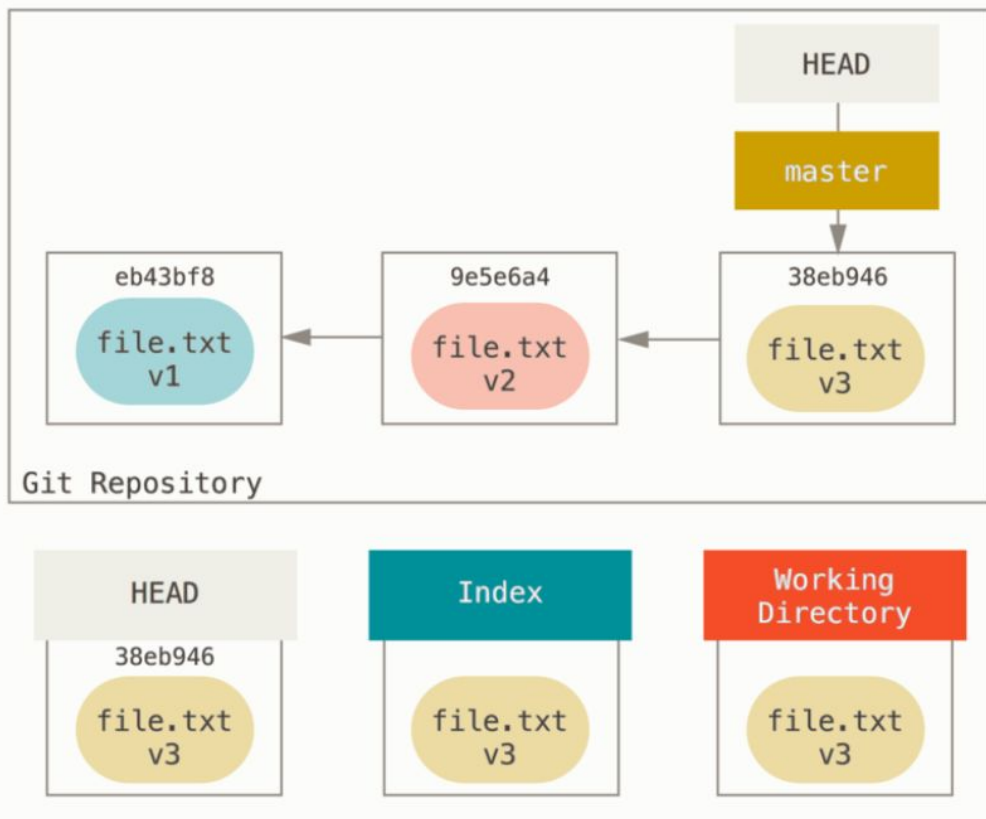

- ❖ Index = staging area
- ❖ Git add = stage files
- ❖ Git commit = commit
- ❖ Git checkout = checkout
- ❖ HEAD points to snapshot

- ❖ <https://git-scm.com/book/en/v2/Git-Tools-Reset-Demystified>

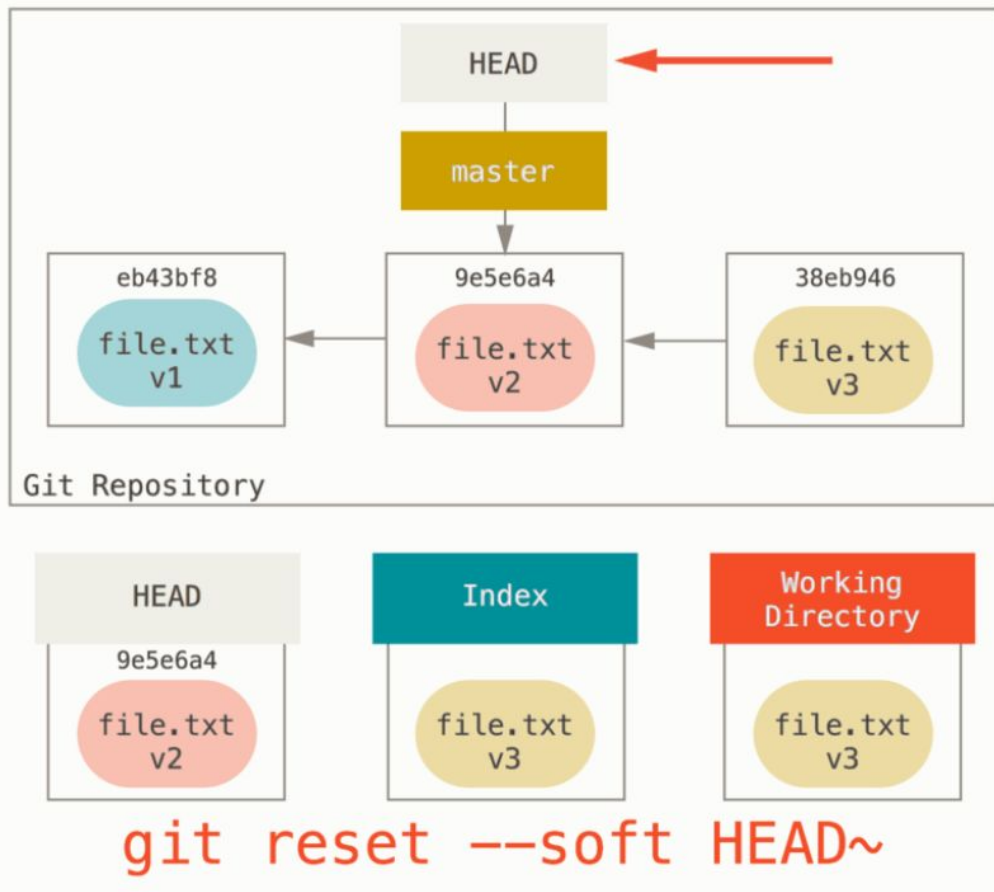

Git - reset

- ❖ Context: we made 3 commits
- ❖ Each time we
 - Git add, git commit
 - HEAD->master pointer moves
 - New commit created, and points to previous commit
- ❖ 3 types of reset
 - Soft, mixed, hard

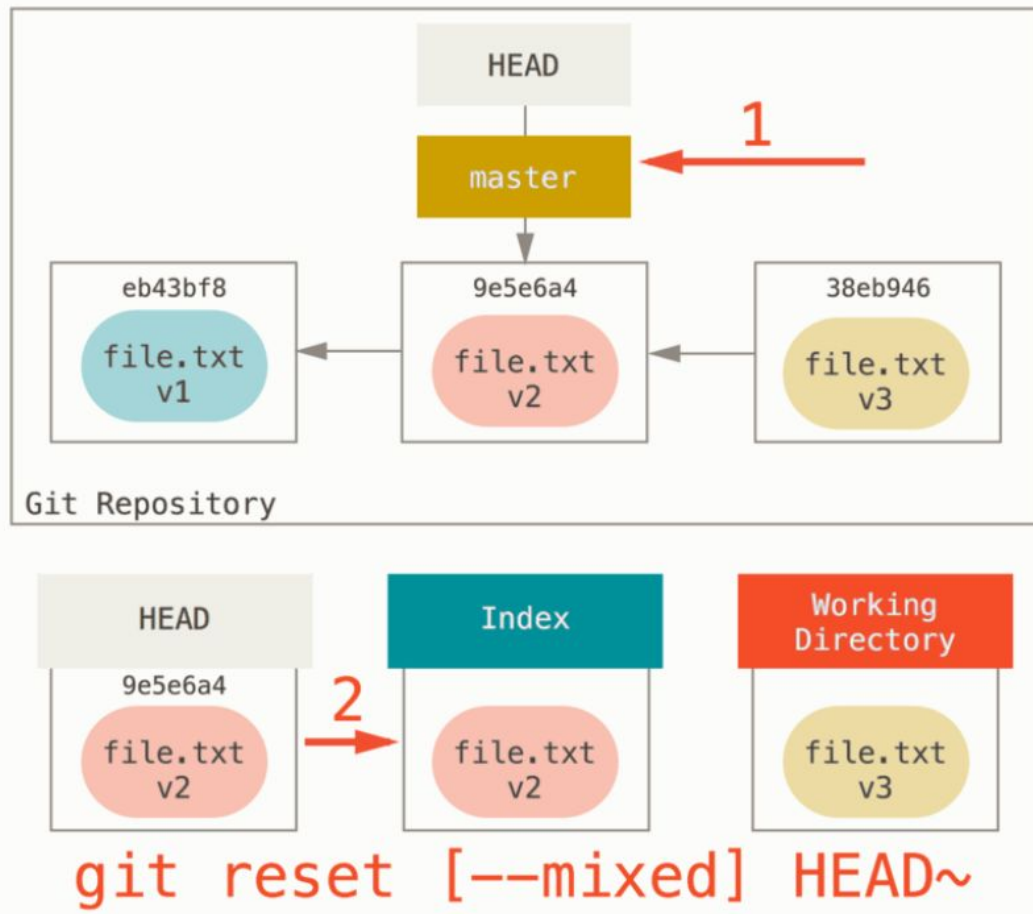

Git - reset soft

- ❖ Note that we moved HEAD
- ❖ HEAD~
 - Refers to previous commit
- ❖ staging area + working dir
 - Same as before
- ❖ Why soft reset?
 - Maybe check diffs,
 - Checkout individual files,
 - Be sure of where pointer is
 - Branch?

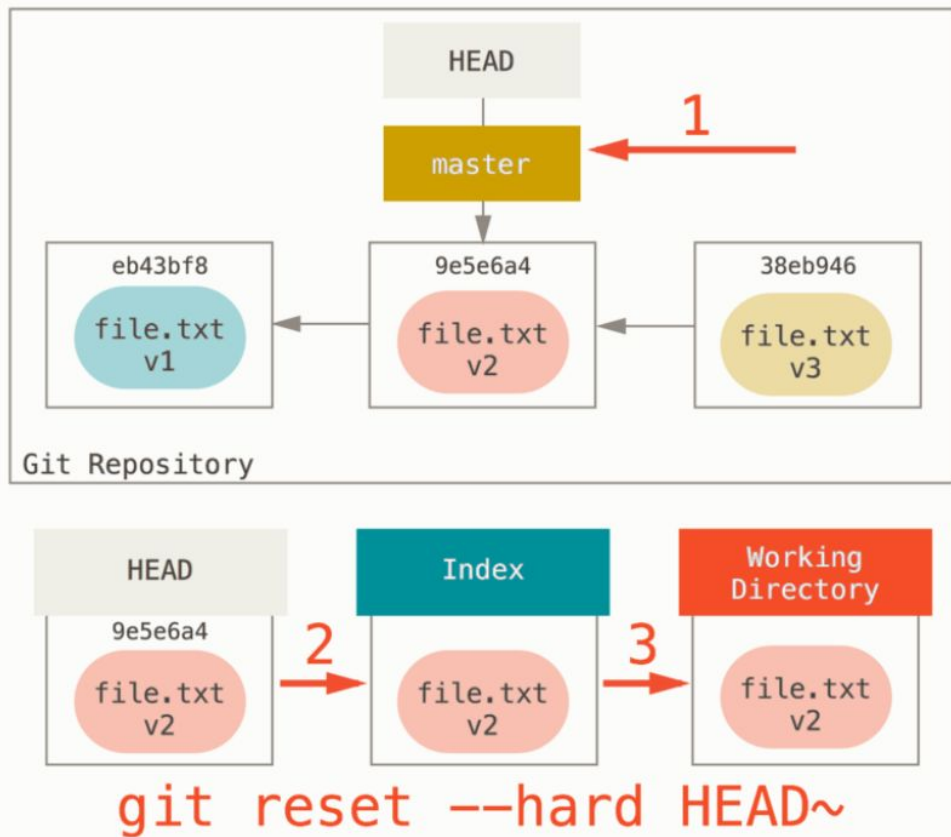

Git - reset mixed

- ❖ Reset soft, and then
- ❖ Change staging area
- ❖ Working directory
 - Same as before
- ❖ Why mixed reset?
 - Undo all git adds
 - + reasons for soft reset

Git - reset hard

- ❖ Reset mixed, and then
- ❖ Change working directory
- ❖ **Lose all progress!!!**
- ❖ Why hard reset?
 - Hard reset
 - Start from beginning

Questions??

Have a great thanksgiving break (please be safe!)

On monday we talk about something fun (topological sort / algorithms!)
